Goya Windsurfing  
Product Overview

[goyawindsurfing.com](http://goyawindsurfing.com)

# Banzai Pro Powerwave 4 Batten

The 2019 Banzai Pro is holding tight to the concept overall, being Goya's maximum modern, explosive power, technical performance World Cup wave sail.

Introducing scrim film material luff panels in 2019 for more depth and flex in the sails, and tremendous tunability, from light downhaul load and a flexy feel to high downhaul tension, finer foil, open head feel with Goya's coveted loose leech.

Special size notes for Banzai Pro include the beautiful new smaller sizes 3.15 to 4.2, which have become shorter, deeper, more stable and more flexible hot rod sails, quiet and comfortable even if you want to sail super strong winds, hold a line, and just enjoy.

The boom on the 4.7 is a touch shorter and this size now really exemplifies the Goya Mix & Match rigging range mast concept. We don't aim to make the sail feel as same as possible rigged on 370 or 400, but rather we desire the 370 to offer the full flex feel, and the 400 to

give the best of that open head locked in feeling. The enormous rigging range and resulting conditions range is an unrivaled plus with these sails.

**Available in 3.15, 3.4, 3.7, 4.0, 4.2, 4.5, 4.7, 5.0, 5.3, 5.5, 5.7, 6.0, 6.3 square meters.**

**Available in fuchsia & yellow or yellow & fuchsia.**

# Banzai X Pro Powerwave 4 Batten

The 2019 Banzai X Pro is virtually the same sail as the Banzai Pro, except for its window material being X-Ply film with spectra yarn reinforcements for maximum durability. Otherwise this sail is holding tight to the same concept of a maximum modern, explosive power, technical performance wave sail.

Introducing scrim film material luff panels in 2019 for more depth and flex in the sails, and tremendous tunability, from light downhaul load and a flexy feel to high downhaul tension, finer foil, open head feel with Goya's coveted loose leech.

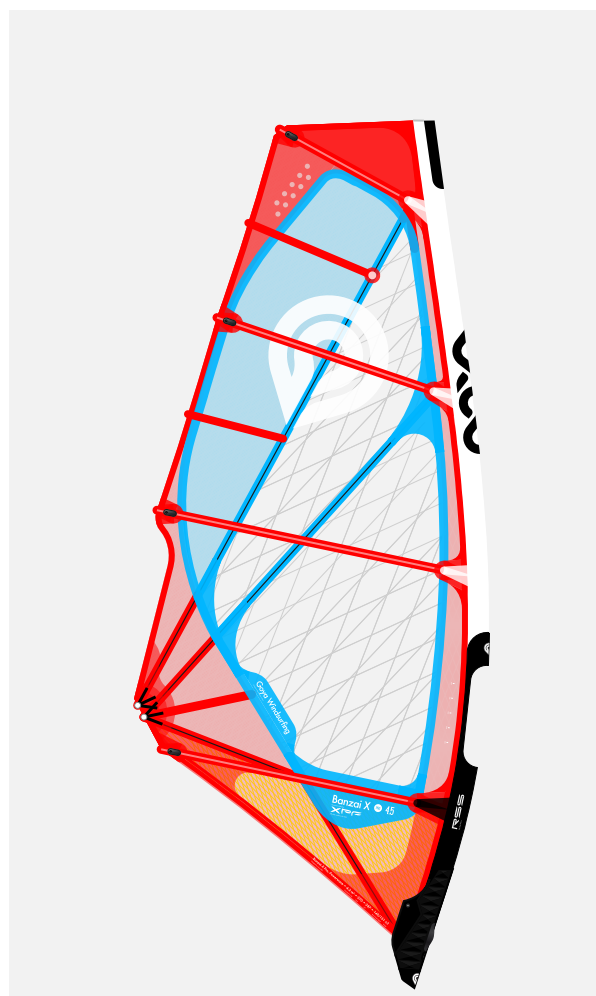

Special size notes for Banzai include the beautiful new smaller sizes 3.15 to 4.2, which have become shorter generally, deeper, more stable and more flexible hot rod sails, quiet and comfortable even if you want to sail super strong winds, hold a line, and just enjoy.

The boom on the 4.7 is a touch shorter and this size now really exemplifies the Goya Mix & Match rigging range

mast concept. We don't aim to make the sail feel as same as possible rigged on 370 or 400, but rather we desire the 370 to offer the full flex feel, and the 400 to give the best of that open head locked in feeling. The enormous rigging range and resulting conditions range is an unrivaled plus with these sails.

**Available in 3.15, 3.4, 3.7, 4.0, 4.2, 4.5, 4.7, 5.0, 5.3, 5.5, 5.7, 6.0, 6.3 square meters.**

**Available in blue & red or red & blue.**

# Fringe Pro Surfwave 3 Batten

**The 2019 Fringe Pro is quicker, more stable and more quiet. Our ultimate modern, superlight, minimalist wave sail. Feather light handling, unlimited maneuverability, amazing power, stability and flex. This year, the foot batten joins the clew point of the sail.**

A bit of a story here. 3 batten wave sail designs have had foot batten configurations one of two ways. Back ends have either been above, and sometimes behind, the clew. We've tested sails this way, and it's a more freerideish sort of feel, not the driven wave setup we're after. Or the traditional foot batten back end well below and in front of the clew.

The Fringe Pro is a bit different. Our foot batten doesn't cross the clew load line but connects right to the clew. The outhaul basically attached to the foot batten makes rider input to the sail mega direct, quick, and easy. This means you get the full effect of attaching your outhaul to the clew point and the foot batten end at the same time. Quickness, lightness, directness, and this is the important

point, you still have full dynamic leech twist all the way down to the clew, to the point you are hanging on to directly. It's a very cool feeling. Gutsy, deep sails that are flexible and opening properly, so that you can be comfortable and confident especially in breaking waves.

A full clearance under the foot allows a lot of freeness between sail and rider. A slightly more upright, simplified outline feeds the sail's quickness.

**Available in 2.8, 3.0, 3.3, 3.5, 3.7, 4.0, 4.2, 4.5, 4.7, 5.0, 5.3, 5.5, 5.7, 6.3 square meters.**

**Available in fuchsia & yellow or yellow & fuchsia.**

**Available in blue & red.**

# Guru X Pro Controlwave 4 Batten

**The Guru X Pro is the traditional wave sail. Proven, popular and just right for sailors looking for easy power, comfort and control in wave and wave style conditions.**

The new Guru X Pro comes with twinpair scrim luff panels, which greatly improve the flex response of the PVC window setup. The scrim luff makes the sail come back to zero right when you want it to.

The 2019 2.7 boom length has been bumped up to 127/130 to fit our booms better.

The Guru X Pro is the product of decade's worth of steady design evolution. A consistent favorite among discerning riders worldwide, it delivers smooth and easy power and effortless handling in strong wind. The cut of the sail, combined with the PVC window make the sail feel soft and light in the hands, allowing for long sessions in challenging conditions with minimal fatigue. The Guru X Pro excels in all wave and wave style sailing conditions,

down the line, onshore waves and powered up chop. The sail pairs with a wide range of fin set ups- single, twin, thruster or quad. In addition to flexible feel, the PVC window, with a little maintenance, will stay clear for the life of the sail.

**Available in 2.7, 3.0, 3.3, 3.5, 3.7, 4.0, 4.2, 4.5, 4.7, 5.0, 5.3 square meters.**

**Available in blue & red or red & blue.**

# Bounce Pro Freestyle 4 Batten

**Direct? Quick? Instant? Responsive? Lifting? Powerful?  
Hello scrim luff! The Bounce Pro is the sail for uncompromised and empowering freestyle windsurfing.**

The new Bounce Pro with its scrim luff panel is an even more precise sail for technical freestyle windsurfing. Lightest weight, instantaneous yet flexible lifting power, stable draft for easy control, high cut foot and raised clew for duck tricks, these are the defining features of this modern technical freestyle windsurfing sail. Combined with the crisp feel of the scrim luff there's nothing in our range that comes close to its pop.

The Bounce Pro pushes deep in to the discipline of modern freestyle, more pop when you need it, more neutral when you don't. Refined outlines, particularly in the foot area of the sail make duck based tricks easier to initiate and execute.

Forward profile transition to leech edge release has been improved on this year's Bounce Pro to offer more efficient

low end power when the gust hits. When the sail loads up, that energy is turned in to forward driving power and speed much more quickly.

**Available in 3.8, 4.2, 4.4, 4.8, 5.1, 5.4, 5.6 square meters.**

**Available in fuchsia & yellow.**

# Nexus Pro Freeride 5 Batten

**The Nexus Pro is the best choice for power, speed and maneuvers in conditions ranging from flat water to bump and jump. This model is super popular, we've had great testing and the customer feedback on this sail has been nothing but universal acclaim.**

The heart and soul of freeride windsurfing is realized in the Nexus Pro. Excellent low-end power, stability and easy control, blazing speed, big jumps and hard carving maneuvers, the sail will deliver beautifully on all of the above. The light, easy handling of the Nexus Pro makes light wind sailing more fun, and makes powered up sailing more comfortable and easy as well. Smaller sizes are cut with higher foots for tight maneuvering, and larger sizes are cut more for low-end power and speed. The Nexus Pro transforms to suit the conditions. Built to last, it features our all of our finest construction details.

The design goal was to improve the high wind control and range of the sail, without losing any of the low end drive the sail is so well loved for. That goal has been

achieved by small refinements in outline, a little shorter, a little more head outline, combined with new seam shape cuts providing a cleaner leech edge release which improves high wind control. At the same time, the Nexus Pro remains very stable.

**Available in 4.9, 5.4, 5.9, 6.4, 6.9, 7.4 square meters.**

**Available in red & black.**

# Mark Pro Freerace 6 Batten

Racing speed made simple. The Mark Pro camless freerace sail is easy to tune and now even faster to rig thanks to its new widened the mast sleeve.

Delivering impressive low end torque and acceleration combined with easy handling when super powered, the Mark Pro allows you to focus on your line and tactics rather than managing your sail. Super lightweight 6 batten build plus truncated boom length give the Mark Pro a compact, light, easy feeling as you accelerate, when you are powered up at speed and through high speed technical transitions around the mark. It is best paired with a freerace or dedicated racing board.

The secret to the Mark Pro's great feeling is in the heart of the sail, the profile, twist and release. A little more shape forward, a smooth transition, and a smooth and clean release, particularly in the leech area just above the boom. The Mark Pro has a more neutral feel when powered up, and when the big gust hits, it stays settled.

Available in 5.4, 5.8, 6.2, 6.6, 7.2, 7.8, 8.5 square meters.

Available in yellow & black.

# Mark 2 Pro Freerace 6 Batten

**The all new Mark 2 Pro is a 2 camber freerace sail delivering flat out slalom race speed.**

The Mark 2 Pro is RDM/SDM compatible on all sizes. It is best rigged "in range", meaning not oversized, in fact, the opposite, since it's so powerful you will want to ride this sail as small as you can for the board you have.

The sail is highly interactive, it can set a line and blaze, but it also likes quick changes of direction, upwind, deep off the wind, speed lines, carving turns.

**Available in 5.4, 5.8, 6.2, 6.6, 7.2, 7.8, 8.5, 9.5 square meters.**

**Available in yellow & black.**

# Scion Pro Youth 3 Batten

The Scion Pro has received a number of small upgrades, including a new scrim luff, making it eligible for Pro status, and it shows just as much as is to be felt. This super lightweight, very durable, easy handling sail delivers premium performance, targeting kids and small/light riders under 45 kilos.

Once again modeled after the highly successful Fringe concept, the Scion Pro delivers all the key features of a top level wave sail, low end power, stability and easy handling. Learning to plane, jump, surf and loop is a blast on this performance wave sail without limitations.

Available in 1.5, 2.0, 2.5, 3.0, 3.5, 4.0 square meters.

Available in green.

# Surf Trainer 1 to 3 Batten

**The Surf is a super light handling and soft feeling beginner sail for newbie windsurfers and schools.**

Dacron and PVC create a very durable trainer sail that can be left rigged for extended periods. Its bright red color is easy to spot from the shore or across the water.

Soft, playful, easy and incredibly durable, the Surf is the perfect beginner sail, or an excellent sail for just cruising on a big board in light wind.

**Available in 1.0, 1.5, 2.0, 2.5, 3.0, 3.5, 4.0, 4.5, 5.0, 5.5 square meters.**

**Available in red.**
